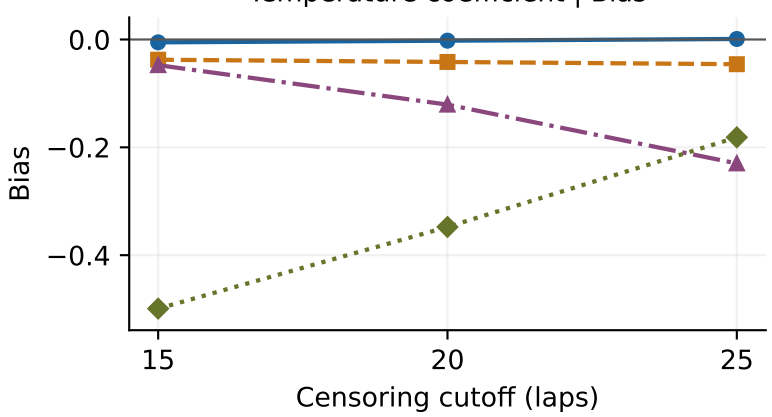
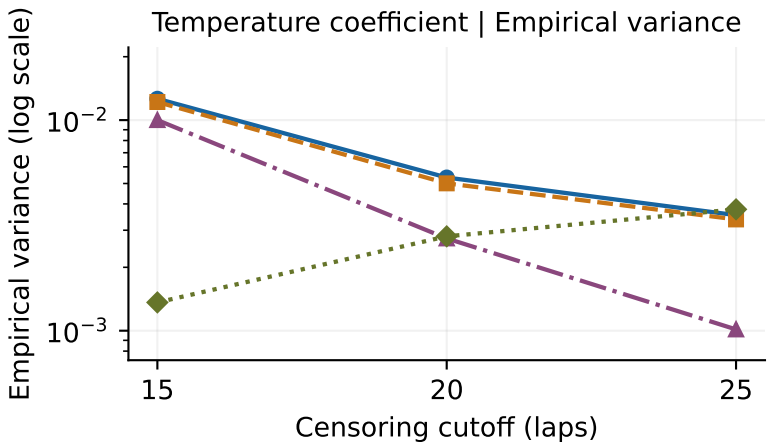
All coefficient and shape estimates | fixed covariates; 2000 repetitions

Correct Weibull · Omit dirty air · Exponential · Naive OLS

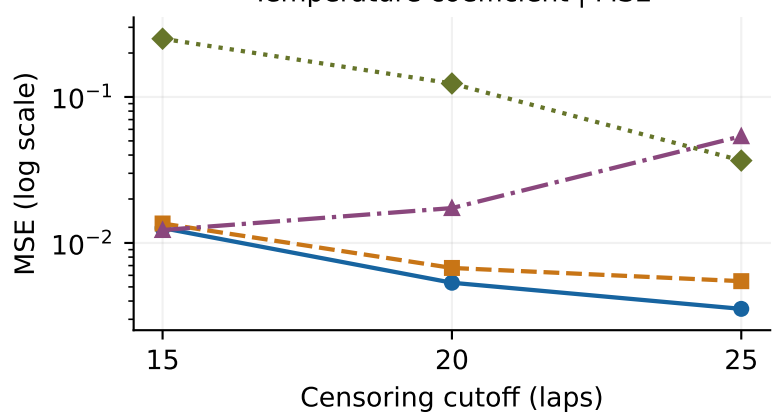
Temperature coefficient | Bias



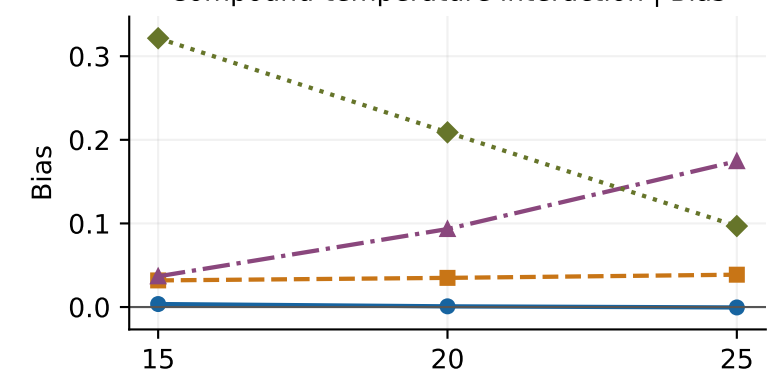
Temperature coefficient | Empirical variance



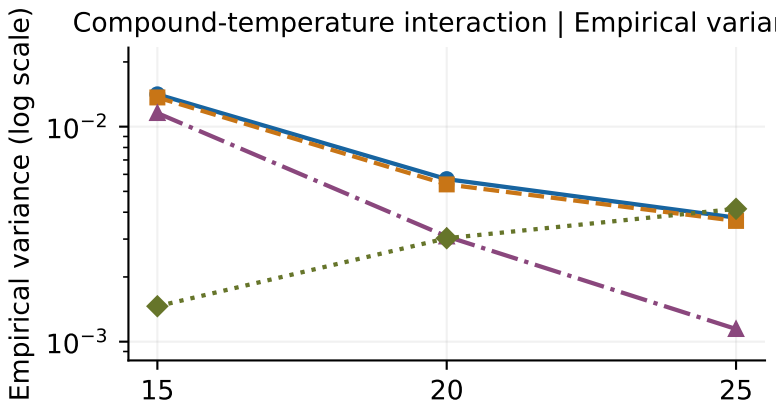
Temperature coefficient | MSE



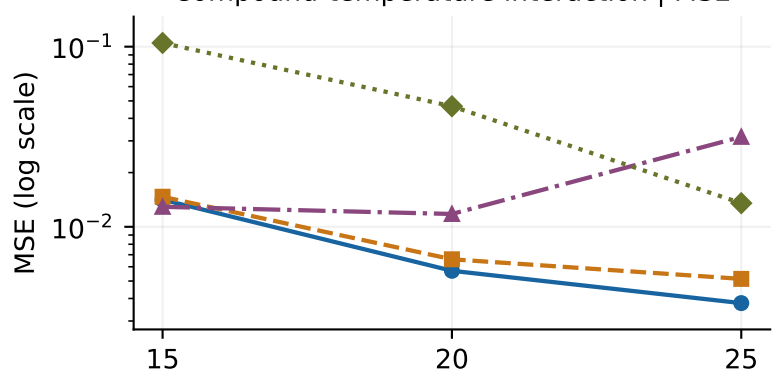
Compound-temperature interaction | Bias



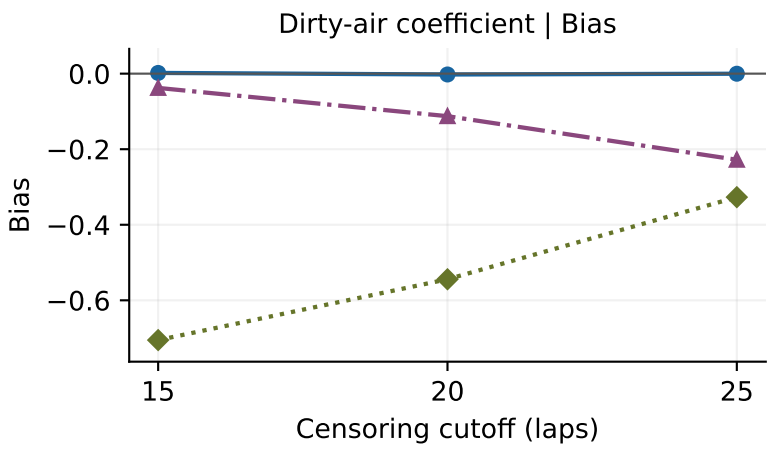
Compound-temperature interaction | Empirical variance



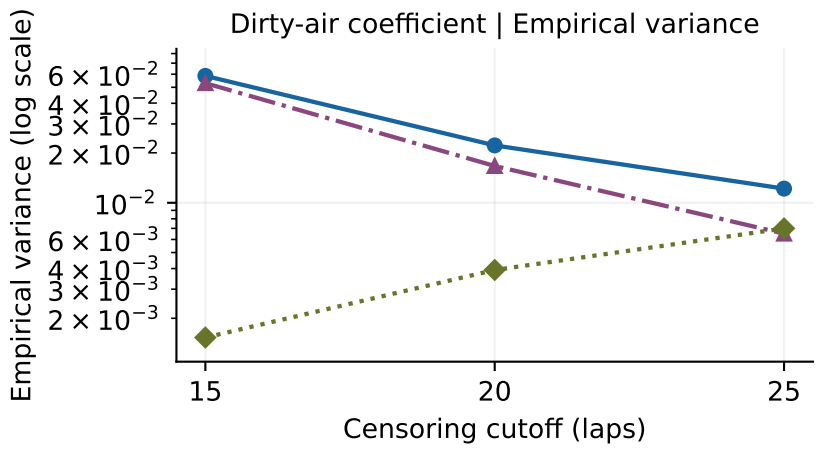
Compound-temperature interaction | MSE



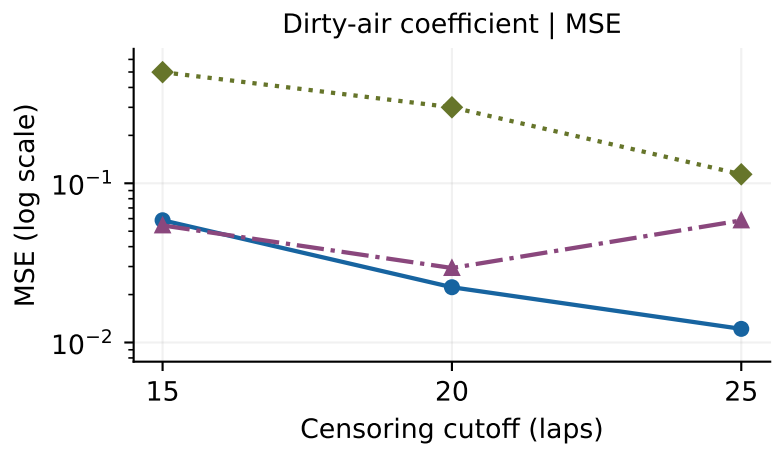
Dirty-air coefficient | Bias



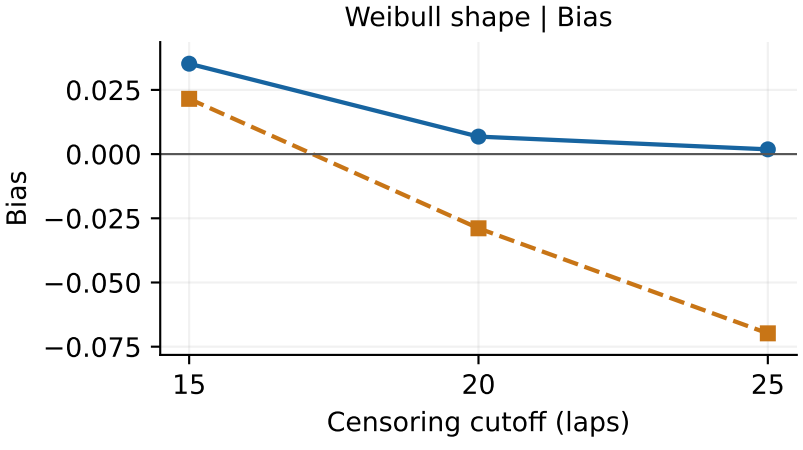
Dirty-air coefficient | Empirical variance



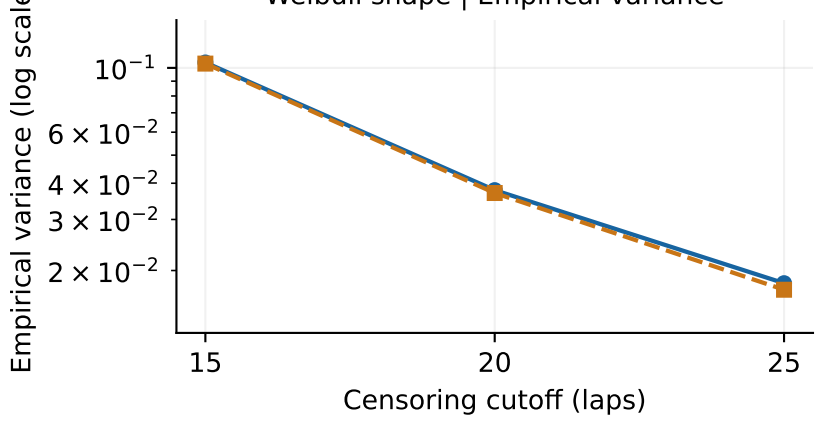
Dirty-air coefficient | MSE



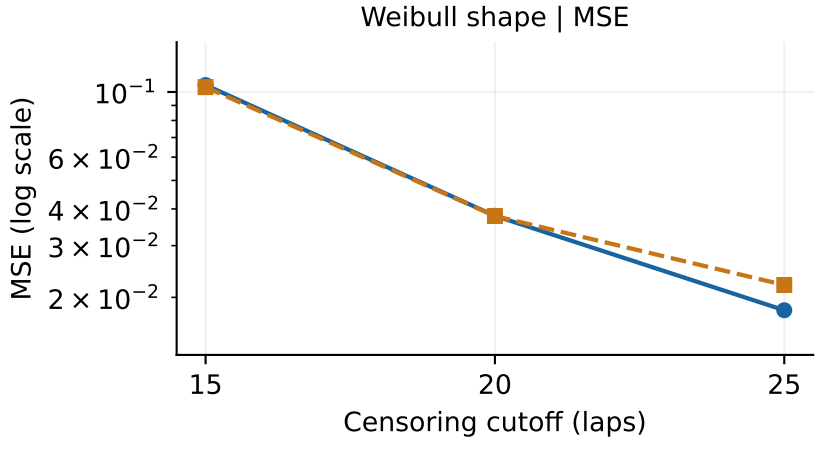
Weibull shape | Bias



Weibull shape | Empirical variance



Weibull shape | MSE



Scales differ between parameters; corresponding panels match across covariate designs.
Dirty-air omission has no dirty-air estimate. Shape is estimated only by the Weibull models.
Summaries use available estimates; see CSV files for success counts and Monte Carlo standard errors.
